TACHOGRAPH TRAINING STATION

The tachograph training station can be used for training sessions on tachographs for specific audiences, such as professional drivers and workshop technicians, as well as for replicating tachograph operation in a vehicle. It allows the simulation of vehicle speed, ignition and headlights.

THE SET INCLUDES:

TRAINING STATION
DTCO 4.1 training
KITAS 2185 18,6 mm training
MOTION SENSOR SEAL
GNSS ANTENNA
DSRC ANTENNA
POWER SUPPLY

All in a robust case

OPTIONAL:

Training cards: driver, company, control and workshop.

CONVINIENT DESIGN:

Easy access to all tachograph outputs and the motion sensor.

PERSONALISED:

Permanent UV printing.

On request, also available with other tachographs: digital, smart, VR2400 or 1324!
